

Student Proficiency Level Report

Pablo Garcia

Grade: 6

Purpose

This report shows the English language development proficiency levels that a student demonstrated on the CELDT. It is one source of information that teachers can use in conferences with parents, and to plan instruction for individual students. The test results should be added to a student's cumulative record.

Observations

The height of the bars in the graph above represents the performance by the student on the California English Language Development Test (CELDT) in each skill area (Listening/Speaking, Reading, and Writing) and as an overall proficiency level. Districts should use the CELDT overall proficiency level as the primary indicator of English proficiency.

Scores that fall within a proficiency level indicate that

the student can display the majority of skills for that level and the levels below, as described on the back of the report. A student may demonstrate competence in some of the skills at higher levels of proficiency, but not enough to have reached the next level.

In order to further develop English language proficiency, a student needs to master the skills at the higher levels of proficiency.

Student Name and Grade Level

Proficiency Levels are given for each of the skill areas (Listening and Speaking, Reading, and Writing) and the Overall Student Proficiency Level. The bars represent this student's proficiency level for each skill area.

Proficiency level skills for each skill area are described on the back of the "Student Proficiency Level Report."
