## CALIFORNIA STATE STANDARDS

Developed by educational leaders and experts from across the country, the California State Standards are a set of high-quality academic standards. These learning standards define the knowledge and skills students should master throughout their K-12 education in order to graduate from high school prepared to succeed in entry-level careers, academic college courses and workforce training programs. In the San Mateo-Foster City School District, our Transitional Kindergarten through 8th grade students and teachers use the California State Standards to define student learning goals, presenting our community's children with optimal opportunity to achieve success in a 21st Century global economy.
